## INMODE AESTHETIC SOLUTIONS INMODE

### Application Radiofrequency skin tightening and more

InMode is a powerful game changer that fuses innovative technologies to enhance aesthetic outcomes. InMode's aesthetic applications provide essentially 15+ revenue streams in one machine. InMode has revolutionary non-invasive options for fractional skin resurfacing and contraction (Fractora), ultra-fast diode hair removal (Diolaze), skin pigmentation and vascular lesions (Lumecca Photofacial), and cellulite/body contouring (BodyFX). InMode will continue to provide superior quality and innovative technology for the most in-demand procedures patients want most. For over two decades the leaders and scientists behind InMode have been revolutionising the medical aesthetic industry with state-of-the-art light, RF and laser solutions that essentially launched and shaped an industry. The research and development team holds over 70 patents and has a proven track record of success. InMode works with a number of applicators. These include Fractora fractional skin rejuvenation for a designer dermis approach to fine lines; Forma/Plus for non-ablative face and body remodelling; BodyFX for novel, long term body contouring and cellulite treatment; Lumecca for IPL skin rejuvenation; and Diolaze for ultra fast diode hair removal featuring 3 PC technology.

## COSMEDICAL TECHNOLOGIES, INC. STEMULOUS

### Application Anti-ageing serum

Stemulous is an exceptional rejuvenating vitamin C serum that contains lilac stem cells. Stemulous combats signs of visible skin ageing, diminishes the appearance of nose to mouth creases, and brightens skin tone. The formula reactivates 14 genes that are responsible for the production of collagen, elastin, and hyaluronic acid, and helps to reduce the accelerated ageing protein progerin. This formula is the result of numerous years of scientific work and clinical research. Stemulous is an exclusive all-in-one serum delivering powerful, proven anti-ageing, as well as acne prevention benefits. Lipid-soluble vitamin C rapidly and easily penetrates the skin, delivering therapeutic levels needed to boost cells to produce collagen and elastin. At Stemulous concentration, lilac stem cells have resulted in a visible reduction in the number of active acne lesions. Marine algae extracts reactivate the metabolism of ageing cells showing in our trials a return to progerin levels associated with skin 20 years younger. Life concentrate undaria algae extract re-densifies the extra-cellular matrix as it works as a genetic stimulant to smooth forehead wrinkles, plump up nasal furrows, and decrease lines above the lips. Stemulous rejuvenates the skin in a way that is unparalleled in the market today.

## OBAGI MEDICAL

# GENTLE REJUVENATION SYSTEM

### Application Topical skincare

The Gentle Rejuvenation System is Obagi's first-ever professional skincare line formulated especially for sensitive skin types. It gently improves the signs and symptoms of premature ageing, leading to an overall improvement in appearance for patients not yet ready for more aggressive therapies. From diminishing fine lines and wrinkles to rejuvenating sun-damaged skin and combating uneven pigmentation, the Gentle Rejuvenation System provides a gentle solution to address signs of premature ageing. The Gentle Rejuvenation System is developed with the following highly effective ingredients: zeatin to improve skin roughness by 86% and kinetin to increase skin's ability to retain moisture by 26% over 24 weeks. This system is ideal for patients with sensitive skin, who are pregnant, nursing, allergic, or sensitive to hydroquinone, or are not yet ready for more aggressive therapies. It helps minimise the visible signs of skin ageing to promote a healthy, youthful glow. The Gentle Rejuvenation System addresses the following skin concerns: fine lines, sun damage, uneven pigmentation, dull/dehydrated skin, deep wrinkles, and blotchiness.

## The latest product news and technologies for the aesthetic and anti-ageing market

### MESOESTETIC PHARMA GROUP MESOHYAL™

#### Application Injectable treatments

mesohyal® – the latest generation of injectable products for mesotherapy treatments. Spanish pharmaceutical laboratory, mesoestetic Pharma Group, an international leader in the cosmetic medicine sector, presents an extensive range of injectable medical devices with CE mark, to administer as mesotherapy with aesthetic purposes. With 11 products, mesohyal™ is currently the most extensive range of injectable products with CE mark that addresses the signs and symptoms of skin ageing, as well as unsightly figure concerns. The products in the mesohyal™ range can be used alone or combined to create made-to-measure cocktails. This makes mesotherapy a highly targeted option for addressing each patient's specific aesthetic disorder. The range includes: mesohyal™ HYALURONIC, mesohyal™ NCTC 109, mesohyal™ VITAMIN C, mesohyal™ DMAE, mesohyal™ ORGANIC SILICON, mesohyal™ OLIGOELEMENTS, mesohyal™ BIOTIN, mesohyal™ CARNITINE, mesohyal™ ARTICHOKE, mesohyal™ MELILOT, and mesohyal™ X-DNA.

### NEOSTRATA COMPANY, INC.

## NEOSTRATA® SKIN ACTIVE

#### Application Cosmeceutical

NeoStrata's clinically proven skincare technologies are now combined with today's most advanced benefit ingredients in its Skin Active cosmeceuticals range designed to lift, firm, plump, and restore skin tone for a noticeably younger and healthier complexion. The new high performance ingredients in the Skin Active range include Maltobionic acid, NeoGlucosamine™ and Swiss apple stem cell extract that work together to stimulate cell renewal, even pigmentation, boost collagen and protect against oxidative damage. When used as a daily regimen, the complementary mechanisms of action work synergistically in all skin layers to deliver outstanding rejuvenating effects, including significant improvement in the appearance of deep wrinkles, crow's feet, sagging, and uneven pigmentation, addressing the needs of mature, photodamaged skin. Developmental studies for NeoStrata Skin Active show high efficacy, good tolerability, and remarkable results. In consumer use testing, users of the full regimen reported noticeable benefits beginning as early as 1 month. NeoStrata Skin Active was recently voted Best Cosmeceutical Range in the aesthetic industry MyFaceMyBody awards.

### THERMIAESTHETICS THERMiRF

#### Application Electrocoagulation and haemostasis

Created by ThermoAesthetics, ThermoIRF is the first aesthetic technology that applies 'science of heat,' using temperature as a clinical endpoint, enabling plastic surgeons and aesthetic physicians to precisely heat soft tissue and nerves to achieve desired aesthetic outcomes. ThermoIRF is cleared by the FDA for dermatologic and general surgical electrocoagulation and haemostasis, and for creation of lesions in nerve tissue. ThermoIRF is the first aesthetic device to deploy simultaneous dual monitoring of tissue temperature (internal and external) using a temperature sensitive treatment probe along with advanced infrared imaging for precise and safe treatments. Micro-invasive applicators include ThermoRase – creation of nerve lesions for toxin-free glabella relaxation, which is an alternative to neurotoxins; and ThermoTight – thermistor-controlled subdermal. Non-invasive applicators include ThermoSmooth – external skin treatments; and ThermoVa – vaginal laxity (future). Since its pre-commercial introduction in the United States in 2012, general plastic and facial plastic surgeons, dermatologists and cosmetic surgeons around the globe have used ThermoIRF in a variety of clinical areas. ThermoIRF applications attract patients seeking an 'in-between' solution to address their cosmetic issues. There is growing demand from baby boomers who are seeking advanced, anti-ageing solutions, which fall 'in-between' non-invasive treatments and major surgery.
