

**LUMECCA LASER**

"I am amazed by the results we are getting from the Lumecca laser (consult with your dermatologist for further information [inmodemd.com](http://inmodemd.com)). This IPL treatment is superior to other IPL treatments on the market, combining high-peak power and optimal spectrum output. Expect a reduction in age spots, broken capillaries, scarring, and an overall improvement in skin complexion. Lumecca can be performed all over the body for the removal of sunspots such as on the neck, chest, hands, and legs."
