

Safe, gentle and effective
laser hair removal

Get beautiful smooth skin with
the most advanced laser hair
removal solution.

WHAT IS THE BENEFIT OF DIOLAZE?

Unlike traditional methods (waxing, shaving, bleaching or using depilatory creams), Diolaze laser hair removal impacts the root of the problem, rather than offering a temporary solution. Traditional methods will require treatment forever, while Diolaze only requires a few sessions. Most patients immediately notice a significant reduction in hair growth after a few sessions and eventually smooth and hair-free skin.

DIOLAZE™

LASER HAIR REMOVAL

Comfortable,
Safe & Effective

THE ULTIMATE SOLUTION TO GETTING RID OF UNWANTED HAIR!

Achieve the smooth and soft skin that you've always wanted with the new champion of laser hair removal.

“I've always grown up with a lot of body hair and I've lived with waxing and shaving my entire life. Diolaze works for me and I'm loving my results.”

SOPHIE, DIOLAZE PATIENT

WHAT IS DIOLAZE?

Diolaze is an advanced laser hair removal procedure that safely and gently eliminates unwanted hair. Diolaze has one of the largest treatment spot sizes, making treatments convenient and fast. The combination of efficacy, patient comfort and speed makes Diolaze the leader in laser hair removal.

HOW DOES DIOLAZE WORK?

During laser treatment, a diode laser beam passes through the skin towards hair follicles. The penetrating energy then heats up the root of the hair, which in turn prevents future hair growth.

DOES IT HURT?

Diolaze has a built in skin cooling surface which is one of the largest for all hair removal devices. This makes treatment more comfortable than other devices, with most patients noting that Diolaze is virtually painless.

WHY DO I NEED MULTIPLE TREATMENTS TO ACHIEVE HAIR REMOVAL?

As with all laser hair removal methods, Diolaze requires a series of treatments. Laser hair removal works best when hair follicles are in their mature stage, however, at any given time, your hair is in various stages of growth.

HOW MANY SESSIONS ARE REQUIRED?

With each treatment, hair is reduced and best results are observed after four to six sessions. The number of sessions will differ depending on your hair color, hair type, body area, and skin tone.

WHICH AREAS OF THE BODY CAN BE TREATED?

Diolaze can be safely used on most areas of the body that have unwanted hair. Most commonly treated areas include: bikini, legs, arms, chest, back, shoulders, stomach, neck, chin and sideburns.
